

Quarterly Market Review

Third Quarter 2017

Q3

Recent trends continued as global markets delivered solid results

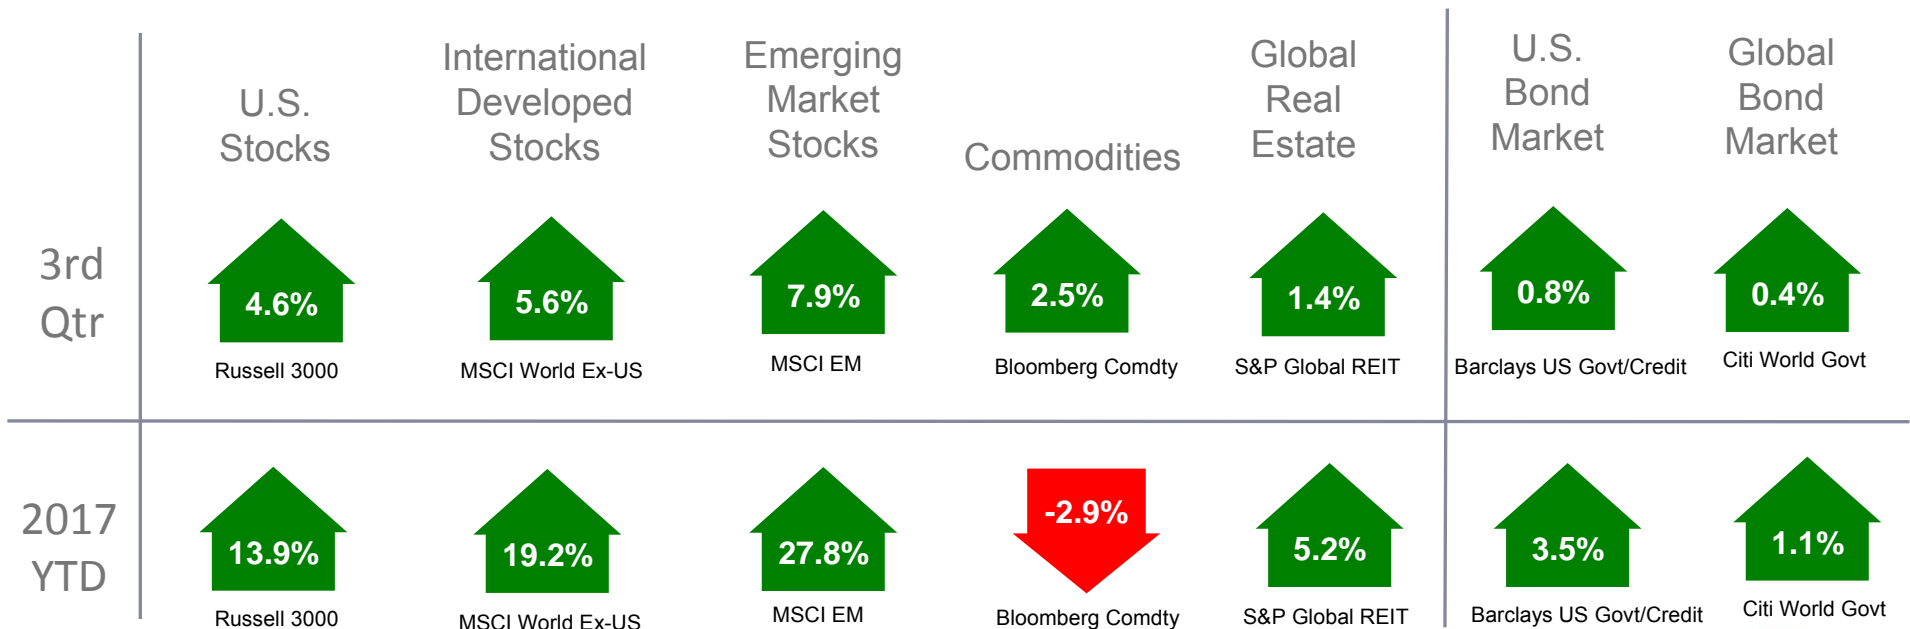

Third Quarter 2017 results

Despite a flurry of unnerving headlines during the quarter, the volatility of global stocks remains at historic lows. Major indices in the U.S., Europe and Asia have managed to avoid a retreat of 5% or more so far in 2017. Typically, 5% pullbacks occur once per quarter with 10% corrections at least annually, and 20% drops once per market cycle for most developed stock markets. It has been about 30 years since investors have witnessed a full calendar year without a 5% decline in at least one of the three major indices (S&P 500, MSCI Europe, MSCI Asia Pacific ex-Japan), so expectations are that volatility should return to normal over the near to mid-term.

Bonds performed solidly as the Federal Reserve held rates steady after their September meeting and further detailed the specifics around plans to downsize the Fed's \$4.5 trillion balance sheet beginning in October. This paves the way for the European Central Bank (ECB) to potentially start winding down their own bond buying program more than three years after the U.S. ended its quantitative easing efforts in 2014.

Supported by a weak dollar, commodities registered their first positive quarter of 2017 with a significant rally from their June lows as industrial metals and energy led the way. Real estate investment trusts (REITs) also inched higher as the global interest rate environment remained generally favorable to the asset class.

Six of the seven asset classes are in positive territory heading into the final quarter of the year:

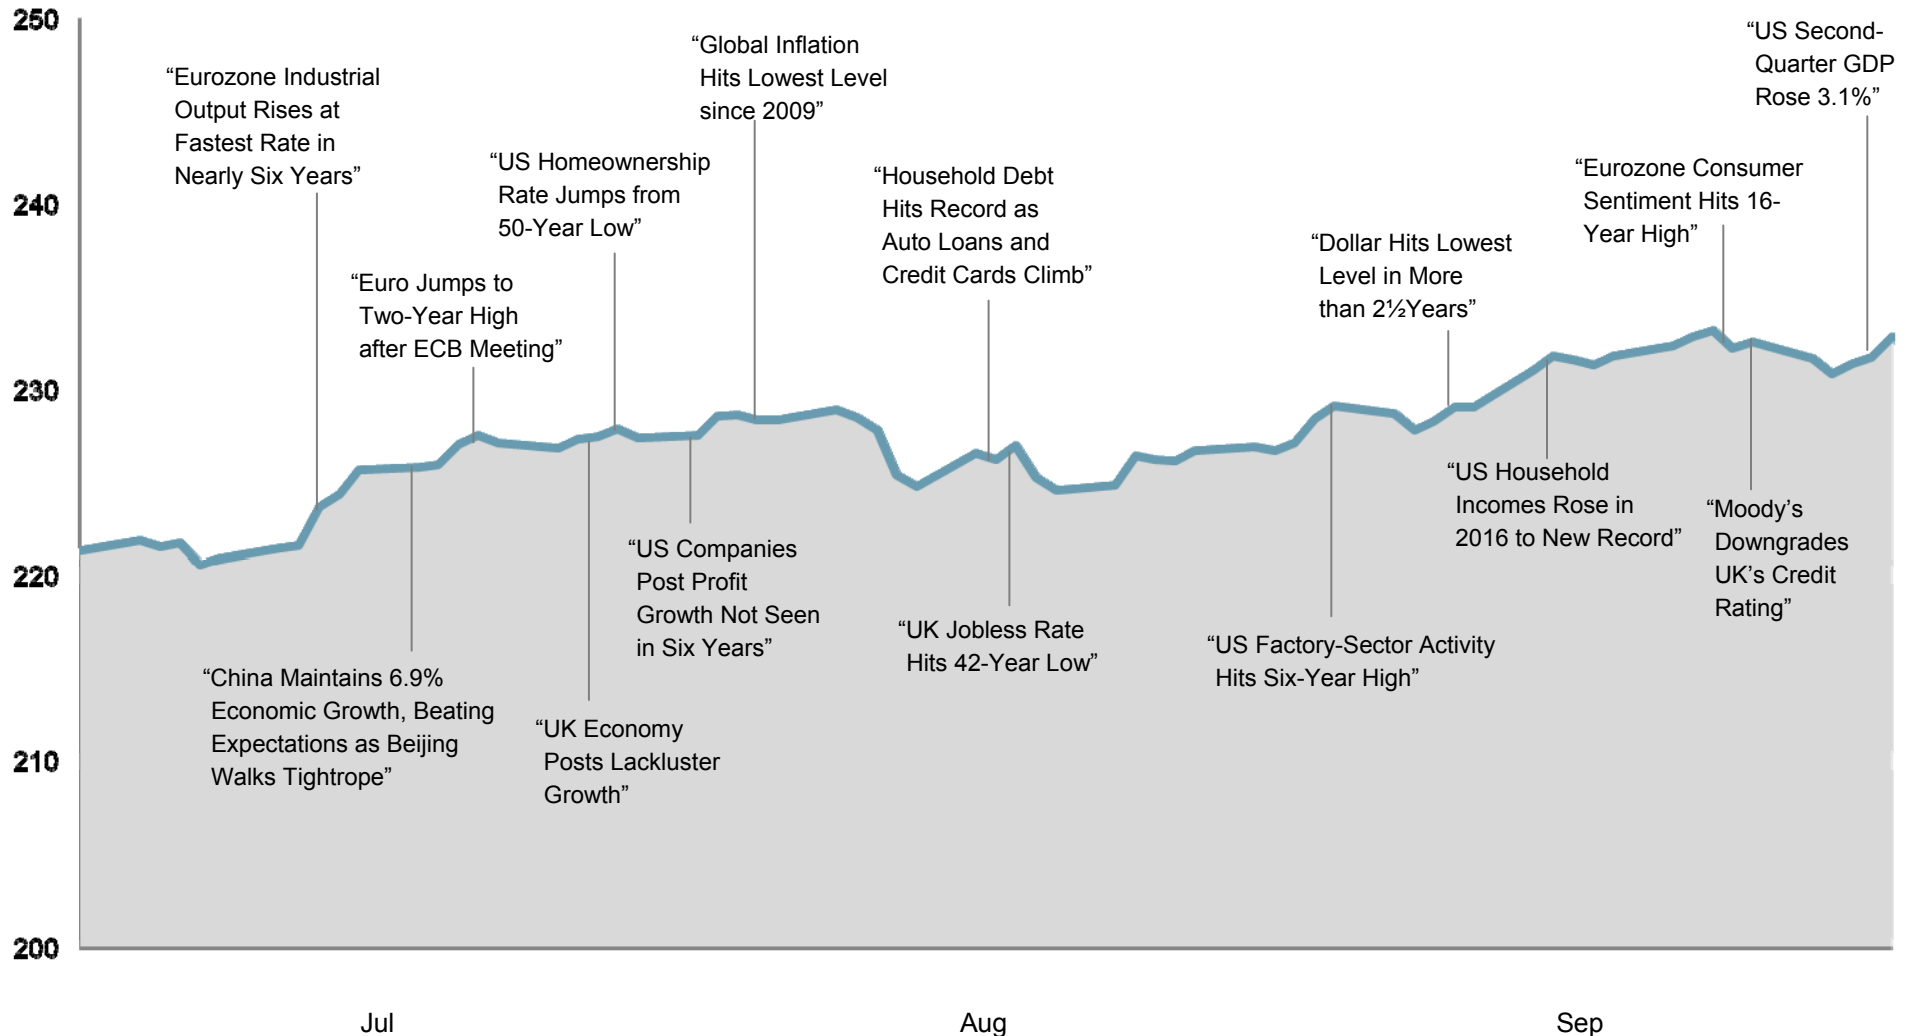

Past performance is not a guarantee of future results. Indices are not available for direct investment. Index performance does not reflect the expenses associated with the management of an actual portfolio. Market segment (index representation) as follows: US Stock Market (Russell 3000 Index), Commodities (Bloomberg Commodity Index), International Developed Stocks (MSCI World ex USA Index [net div.]), Emerging Markets (MSCI Emerging Markets Index [net div.]), Global Real Estate (S&P Global REIT Index), US Bond Market (Barclays US Govt./Credit), and Global Bond ex US Market (Citigroup WGBI ex USA 1-5 Years [Hedged to USD]). Emerging market stocks led the way for second quarter in a row

Third Quarter 2017 Index Returns

In US dollar terms, emerging markets indices outperformed developed market indices, including the US, during the quarter.

With broad market indices used as proxies, the value effect was negative. Across the size spectrum in the large and mid cap space, the value effect was negative; however, in the small cap space, the effect was positive.

Overall, small caps underperformed large caps in emerging markets.
